gold: more accurate and cheaper, Laya beats Jev
11,274 labels: more accurate than Jev
more accurate
green, between the solid line and a curve:
non-inferior and cheaper, the fine-tune pays off
4,000 labels: non-inferior to Jev (margin 2 points)
fewer than 4,000 labels: Laya is not non-inferior to Jev,
so no price of a label makes the fine-tune pay off
